## **UEFI BIOS Setup**

### **Introduction**

The purpose of this manual is to describe the settings in the AMI UEFI BIOS Setup program on this motherboard. The Setup program allows users to modify the basic system configuration and save these settings to NVRAM. UEFI BIOS determines what a computer can do without accessing programs from a disk. This system controls most of the input and output devices such as keyboard, mouse, serial ports and disk drives. BIOS activates at the first stage of the booting process, loading and executing the operating system. Some additional features, such as virus and password protection or chipset fine-tuning options are also included in UEFI BIOS.

The rest of this manual will guide you through the options and settings in UEFI BIOS Setup.

### **Plug and Play Support**

This AMI UEFI BIOS supports the Plug and Play Version 1.0A specification.

### **EPA Green PC Support**

This AMI UEFI BIOS supports Version 1.03 of the EPA Green PC specification.

### **ACPI Support**

AMI ACPI UEFI BIOS support Version 1.0/2.0 of Advanced Configuration and Power interface specification (ACPI). It provides ASL code for power management and device configuration capabilities as defined in the ACPI specification, developed by Microsoft, Intel and Toshiba.

### **PCI Bus Support**

This AMI UEFI BIOS also supports Version 2.3 of the Intel PCI (Peripheral Component Interconnect) local bus specification.

### **DRAM Support**

DDR3 SDRAM (Double Data Rate III Synchronous DRAM) is supported.

## Using Setup

When starting up the computer, press **<Del>** during the **Power-On Self-Test (POST)** to enter the UEFI BIOS setup utility.

In the UEFI BIOS setup utility, you will see **General Help** description at the top right corner, and this is providing a brief description of the selected item. **Navigation Keys** for that particular menu are at the bottom right corner, and you can use these keys to select item and change the settings.

## Notice

- The default UEFI BIOS settings apply for most conditions to ensure optimum performance of the motherboard. If the system becomes unstable after changing any settings, please load the default settings to ensure system's compatibility and stability. Use Load Setup Default under the Exit Menu.
- For better system performance, the UEFI BIOS firmware is being continuously updated. The UEFI BIOS information described in this manual is for your reference only. The actual UEFI BIOS information and settings on board may be slightly different from this manual.
- The content of this manual is subject to be changed without notice. We will not be responsible for any mistakes found in this user's manual and any system damage that may be caused by wrong-settings.

## 1 Main Menu

Once you enter AMI UEFI BIOS Setup Utility, the Main Menu will appear on the screen providing an overview of the basic system information.

### BIOS Information

It shows system information including UEFI BIOS version, Project Code, Model Name, Build Date and etc.

### Total Memory

Shows system memory size, VGA shard memory will be excluded.

### System Language

Choose the system default language.

### System Date

Set the system date. Note that the 'Day' automatically changes when you set the date.

### System Time

Set the system internal clock.

## 2 Advanced Menu

The Advanced Menu allows you to configure the settings of CPU, Super I/O, Power Management, and other system devices.

### Notice

Beware of that setting inappropriate values in items of this menu may cause system to malfunction.

### PCI Subsystem Settings

### PCI Latency Timer

This item sets the value to be programmed into PCI Latency Timer Register.

Options: 32 PCI Bus Clocks (Default) / 64 PCI Bus Clocks / 96 PCI Bus  
Clocks / 128 PCI Bus Clocks / 160 PCI Bus Clocks / 192 PCI Bus  
Clocks / 224 PCI Bus Clocks / 248 PCI Bus Clocks

### VGA Palette Snoop

This item enables or disables VGA Palette Registers Snooping.

Options: Disabled (Default) / Enabled

### PCI Express Settings

#### No Snoop

This item enables or disables PCI Express Device No Snoop option.

Options: Enabled (Default) / Disabled

#### Maximum Payload

This item sets Maximum Payload of PCI Express Device or allows System BIOS to select the value.

Options: Auto (Default) / 128 Bytes / 256 Bytes / 512 Bytes / 1024 Bytes /  
2048 Bytes / 4096 Bytes

#### Maximum Read Request

This item sets Maximum Read Request Size of PCI Express Device or allows System BIOS to select the value.

Options: Auto (Default) / 128 Bytes / 256 Bytes / 512 Bytes / 1024 Bytes /  
2048 Bytes / 4096 Bytes

### **Restore PCIE Registers**

On non-PCI Express aware OS's (Pre Windows Vista) some devices may not be correctly reinitialized after S3. Enabling this restores PCI Express device configurations on S3 resume. Warning: Enabling this cause issues with other hardware after resume.

Options: Disabled (Default) / Enabled

### **ACPI Settings/ WakeUp Event control**

### **EuP Control**

When EuP is enabled, the system will meet EuP requirement. All wake up events do not work except Power Button after power down system (S5).

Options: Disabled (Default) / Enabled

### **ACPI Sleep State**

This item selects the highest ACPI sleep state the system will enter when the SUSPEND button is pressed.

Options: S3 only (Suspend to RAM) (Default) / Suspend Disabled

### **PME Wake up from S5**

The item enables the system to wake from S5 using PME event.

Options: Disabled (Default) / Enabled

### **Wake system with Fixed Time**

This item enables or disables the system to wake on by alarm event. When this item is enabled, the system will wake on the hr::min::sec specified.

Options: Disabled (Default) / Enabled

### Wake up date

You can choose which date the system will boot up.

### Wake up hour / Wake up minute / Wake up second

You can choose the system boot up time, input hour, minute and second to specify.

### PS2 Keyboard PowerOn

This item allows you to control the keyboard power on function.

Options: Disabled (Default) / Any Key / Stroke Key / Specific Key

### Stroke Keys

This item will show only when Keyboard PowerOn is set "Stroke Key."

Options: Wake Key (Default) / Power Key / Ctrl+F1 / Ctrl+F2 / Ctrl+F3 / Ctrl+F4 / Ctrl+F5 / Ctrl+F6

### Specific Key

This item will show only when Keyboard PowerOn is set "Specific Key."

Press Enter to set Specific key.

### PS2 Mouse PowerOn

This item allows you to control the mouse power on function.

Options: Disabled (Default) / Enabled

### USB Device Wakeup from S3/S4

This item allows you to enable or disabled the USB resume from S3/S4 function.

Options: Disabled (Default) / Enabled

## CPU Configuration

This item shows CPU Information

**PSS Support**

This item allows you to enable or disable No-execute page protection Function.

Options: Enabled (Default) / Disabled

**NX Mode**

This item allows you to enable or disable No-execute page protection Function

Options: Enabled (Default) / Disabled

**SVM**

This item allows you to enable AMD virtualization in CPU.

Options: Enabled (Default) / Disabled

**C6 Mode**

This item allows you to enable or disable C6.

Options: Enabled (Default) / Disabled

**CPB Mode**

This item allows you to enable or disable CPB.

Options: Auto (Default) / Disabled

**HTC temperature limit**

This item allows you to set HTC temperature limit. Range: 70°C - 110°C

Options: 90°C (Default)

**Core Leveling**

Change the number of compute unit in the system

Options: Automatic mode (Default) / Three cores per processor / Two cores per processor / One core per processor

## SATA Configuration

The BIOS will automatically detect the presence of SATA devices. There is a sub-menu for each SATA device. Select a device and press <Enter> to enter the sub-menu for detailed options.

### OnChip SATA Channel

This item allows you to enable or disable OnChip SATA Channel Options: Enabled (Default) / Disabled

### OnChip SATA Type

This item allows you to set OnChip SATA type.  
Options: Native IDE (Default) / AHCI / Legacy IDE

### OnChip IDE Mode

This item allows you to enable or disable OnChip IDE Mode.  
Options: Legacy Mode (Default) / Native Mode

## USB Configuration

### Legacy USB Support

The item allows you to enable Legacy USB support. AUTO option disables legacy support if no USB devices are connected. DISABLE option will keep USB devices available only for EFI applications.

Options: Enabled (Default) / Disabled / Auto

### USB3.0 Support

The item allows you to enable or disable Legacy USB3.0 (XHCI) Controller support.

Options: Enabled (Default) / Disabled

### XHCI Hand-Off

This is a workaround for OSes without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.

Options: Enabled (Default) / Disabled

### EHCI Hand-Off

This is a workaround for OSes without EHCI hand-off support. The EHCI ownership change should be claimed by EHCI driver.

Options: Disabled (Default) / Enabled

## Smart Fan Control

### CPU Smart Fan

This item allows you to control the CPU Smart Fan function.

Options: Disabled (Default) / Auto

### CPU FAN Calibrate

Press [ENTER] to calibrate CPU Fan.

### Control Mode

This item provides several operation modes of the fan.

Options: Quiet / Aggressive / Manual

### Fan Ctrl OFF(°C)

When CPU temperature is lower than this value, the CPU fan will keep lowest RPM.

Options: 10 (°C) (default)

### Fan Ctrl On(°C)

When CPU temperature is higher than this value, the CPU fan controller will turn on.

Options: 40 (°C) (Default)

### Fan Ctrl Start Value

This item sets CPU FAN Start Speed Value.

Options: 64 (Default)

### Fan Ctrl Sensitive

The bigger the numeral is, the higher the FAN speed is.

Options: 50 (Default)

## Super IO Configuration

### Restore AC Power Loss

This setting specifies how your system should behave after a power fail or interrupts occurs. Power Off: Leaving the system in power-off status after power recovers. Power ON: Powering on the system immediately when power returns. Last State: 1. Leaving the system in power-off if the system shuts down at DC off status; 2. Powering on the system immediately if the system shuts down at DC on status.

Options: Power Off (Default) / Power On / Last State

### Serial Port 1 Configuration

### Serial Port

This item enables or disables Serial Port (COM).

Options: Enabled (Default) / Disabled

### **Change Settings**

This item selects an optimal setting for Super IO device.

Options: Auto (Default) / IO=3F8h; IRQ=4 / IO=3F8h; IRQ=3, 4, 5, 6, 7, 10, 11, 12 / IO=2F8h; IRQ=3, 4, 5, 6, 7, 10, 11, 12 / IO=3E8h; IRQ=3, 4, 5, 6, 7, 10, 11, 12 / IO=2E8h; IRQ=3, 4, 5, 6, 7, 10, 11, 12

### **Parallel Port Configuration**

#### **Parallel Port**

This item enables or disables Parallel Port (LPT/LPTE).

Options: Enabled (Default) / Disabled

#### **Change Settings**

This item allows you to select an optimal setting for Super IO device.

Options: Auto (Default) / IO=378h; IRQ=5 / IO=378h; IRQ=5, 6, 7, 10, 11, 12 / IO=278h; IRQ=5, 6, 7, 10, 11, 12 / IO=3BCh; IRQ=5, 6, 7, 10, 11, 12 / IO=378h; / IO=278h; / IO=3BCh;

#### **Device Mode**

This item allows you to change the Printer Port mode.

Options: Standard Parallel Port Mode (Default) / EPP Mode / ECP Mode / EPP Mode and ECP Mode

## H/W Monitor

### PWM Processor Hot

This item enables or disables PWM Processor Hot.

Options: Auto (Default) / 60°C/140°F / 65°C/149°F / 70°C/158°F / 75°C/167°F / 80°C/176°F / 85°C/185°F / 90°C/194°F / Disabled

### Shutdown Temperature

This item allows you to set up the CPU shutdown Temperature.

Options: Disabled (Default) / 70°C/158°F / 75°C/167°F / 80°C/176°F / 85°C/185°F / 90°C/194°F

## Network Stack

### Network Stack

This item enables or disables UEFI network stack

Options: Disabled (Default) / Enabled

*Note: The following items appear only when you set the Network Stack item to [Enabled]*

### IPv4 PXE Support

This item enables or disables IPv4 PXE Boot Support. If disabled IPv4 boot option will not be created.

Options: Enabled (Default) / Disabled

### IPv6 PXE Support

This item enables or disables IPv6 PXE Boot Support. If disabled IPv6 boot option will not be created.

Options: Enabled (Default) / Disabled

### PXE boot wait time

Wait time to press ESC key to abort the PXE boot.

## 3 Chipset Menu

This section describes configuring the PCI bus system. PCI, or Personal Computer Interconnect, is a system which allows I/O devices to operate at speeds nearing the speed of the CPU itself uses when communicating with its own special components.

### Notice

Beware of that setting inappropriate values in items of this menu may cause system to malfunction.

### South Bridge

### SB USB Configuration

#### XHCI Controller

This item allows you to switch XHCI.

Options: Enabled (Default) / Disabled

#### OHCI HC (Bus 0 Dev 18/19/22 Fn 0)

This item allows you to control OHCI host controller. (USB 1.1 Device)

Options: Enabled (Default) / Disabled

#### EHCI HC (Bus 0 Dev 18/19/22 Fn 2)

This item allows you to control EHCI host controller. (USB 2.0 Device)

Options: Enabled (Default) / Disable

*Note: OHCI HC (Bus 0 Dev 22 Fn 0) and EHCI HC (Bus 0 Dev 22 Fn 2) items will appear, when you set the XHCI Controller item to disabled.*

### SB Azalia Audio Configuration

### **HD Audio Azalia Device**

This item allows you to control the HD audio device.  
Options: Enabled (Default) / Auto / Disabled

### **North Bridge**

#### **Gnb Hd Audio**

It enables or disables Gnb Hd Audio support.  
Options: Enabled (Default) / Disabled

### **GFX Configuration**

### **Primary Video Device**

This item allows you to select Primary Video Device that BIOS will use to for output.

Options: NB PCIe slot Video (Default) / IGD Video

### **Integrated Graphics**

This item set integrated graphics controller.

Options: Auto (Default) / Disabled / Force

*Note: The following items appear only when you set the Integrated Graphics item to [Force]*

**UMA Frame Buffer Size:** 32M / 64M / 128 M / 256 M / 512M / 1G / 2G

### **PSPP Policy**

This item allows you to set PCIe speed power policy.

Options: Balanced-High (Default) / Disabled / Performance / Balanced-Low / Power Saving

### **Surround View**

This item supports multi-display function.

Options: Disabled (Default) / Enabled

## **Onboard Devices**

### **Realtek PCIE NIC**

This item enables/disables Realtek PCIE NIC

Options: Enabled (Default) / Disabled

### **Onboard LAN Option ROM**

This item enables/disables Onboard LAN Option ROM

Options: Disabled (Default) / Enabled

## 4 Boot Menu

This menu allows you to setup the system boot options.

### Setup Prompt Timeout

This item sets number of seconds to wait for setup activation key.

Options: 2 (Default)

### Bootup NumLock State

This item selects the keyboard NumLock state.

Options: On (Default) / Off

### Full Screen Logo Display

This item allows you to enable/disable Full Screen Logo Show function.

Options: Enabled (Default) / Disabled

### Fast Boot

This item allows you to enable/disable boot with initialization of a minimal set of devices required to launch active boot option. Has no effect for BBS boot options.

Options: Disabled (Default) / Enabled

*Note: The following items appear only when you set the Fast Boot function to [Enabled]*

### SATA Support

Options: Last Boot HDD Only (Default) / All SATA Devices

**VGA Support**

If Auto, only install Legacy OpRom with Legacy OS and logo would NOT be shown during post. EFI driver will still installed with EFI.  
Options: EFI Driver (Default) / Auto

**USB Support**

If Disabled, all USB devices will NOT be available until after OS boot. If Partial Initial, specific USB port/device will NOT be available before OS boot. If Enabled, all USB devices will be available in OS and Post.  
Options: Full Initial (Default) / Partial Initial / Disable

**PS2 Devices Support**

If Disabled, PS2 devices will be skipped.  
Options: Enabled (Default) / Disable

**Network Stack Driver Support**

If Disabled, Network Stack Drivers will be skipped.  
Options: Disable (Default) / Enabled

**BIOS Flash protection**

While enabled, it can't flash write and flash erase by SMI.  
Options: Enabled (Default) / Disabled

**Boot Success Beep**

When this item is set to Enabled, BIOS will let user know boot success with beep.  
Options: Enabled (Default) / Disabled

**Boot Option #1/#2/#3**

The items specify the boot device priority sequence from the available devices. The number of device items that appears on the screen depends on the number of devices installed in the system.

**CD/DVD ROM Drive BBS Priorities**

This item sets the order of the legacy devices in this group.

**Hard Drive BBS Priorities**

This item sets the order of the legacy devices in this group.

## CSM16 parameters

### GateA20 Active

Upon Request – FA20 can be disabled using BIOS services. Always – do not allow disabling GA20; this option is useful when any RT code is executed above 1MB

Options: Upon Request (Default) / Always

### Option ROM Messages

This item sets the display mode for option ROM.

Options: Force BIOS (Default) / Keep Current

### INT19 Trap Response

BIOS reaction on INT19 trapping by Option ROM: IMMEDIATE – execute the trap right away; POSTPONED – execute the trap during legacy boot.

Options: Postponed (Default) / Immediate

## CSM parameters

### **Launch CSM**

This option controls if CSM will be launched.

Options: Enabled (Default) / Disabled

### **Boot option filter**

This option controls what devices system can boot to.

Options: UEFI and Legacy (Default) / Legacy only / UEFI only

### **Launch PXE OpROM policy**

This item controls the execution of UEFI and Legacy PXE OpROM

Options: Legacy only (Default) / UEFI only / Do not launch

### **Launch Storage OpROM policy**

This item controls the execution of UEFI and Legacy Storage OpROM

Options: Legacy only (Default) / UEFI only / Do not launch

### **Launch Video OpROM policy**

This item controls the execution of UEFI and Legacy Video OpROM

Options: Legacy only (Default) / UEFI only / Do not launch

### **Other PCI device ROM priority**

For PCI devices other than Network, Mass storage or Video defines which OpROM to launch

Options: UEFI OpROM (Default) / Legacy OpROM

## 5 Security Menu

### Administrator Password

This item sets Administrator Password.

### User Password

This item sets User Password.

### Secure Boot Menu

### Secure Boot Control

Secure Boot flow control. Secure Boot can be enabled if 1. System running in User mode with enrolled Platform Key(PK) 2.CSM function is

disabled.

Options: Disabled (Default) / Enabled

*Note: The following items appear only when you set the Secure Boot Control function to [Enabled]*

### Key Management

#### Enroll All Factory Default Keys

Forces system to user Mode – Install all Factory Default keys (PK, KEK, db, dbx, dbt). Change takes effect after reboot.

#### Platform Key (PK)

Delete PK – Allows you to delete the PK file from your system.

Set new PK – Allows you set new PK file.

#### Key Exchange Key Database (KEK)

Delete KEK – Allows you to delete the KEK file from your system.

Set new KEK – Allows you set new KEK file.

Append Var to KEK – Allows you append Var to KEK.

#### Authorized Signature Database (DB)

Delete DB – Allows you to delete the DB file from your system.

Set new DB – Allows you set new DB file.

Append Var to DB – Allows you append Var to DB.

#### Authorized TimeStamps (DBT)

Delete DBT – Allows you to delete the DBT file from your system. Set new

DBT – Allows you set new DBT file.

Append Var to DBT – Allows you append Var to DBT.

#### Forbidden Signature Database (DBX)

Delete DBX – Allows you to delete the DBX file from your system.

Set new DBX – Allows you set new DBX file.

Append Var to DBX – Allows you append Var to DBX.

## 6 Performance Menu

This submenu allows you to change voltage and clock of various devices.  
(However, we suggest you use the default setting. Changing the voltage and clock improperly may damage the device.)

### Notice

- Beware of that setting inappropriate values in items of this menu may cause system to malfunction.
- The options and default settings might be different by RAM or CPU models.

### AMD Pstate Configuration

### Custom P-State

This item will tell BIOS whether to use the step option below this configure the P-State, or whether to configure the P-States automatically.

Options: Disabled (Default) / Enabled

*Note: The following items appear only when you set the Custom P-State item to [Enabled]*

#### Core FID

This item sets the frequency to use for Core P-State selected. Value is saved in the \_PSS object.

Options: x8 800MHz ~ x36 3600MHz

#### Core VID

This function allows you to adjust the voltage of Core.

### Over Voltage Configuration

#### DDR Memory Voltage

This item sets DDR Memory voltage control.

Options: AUTO (Default) / 1.275V / 1.325V / 1.375V / 1.425 V / 1.575V / 1.625V / 1.675V

## DRAM Timing Configuration

### MCT Timing Mode

Select the DRAM Frequency programming method. If Auto, the DRAM speed will be based on SPDs. If Limit, the DRAM speed will not exceed the specified value. If Manual, the DRAM speed specified will be programmed regardless of SPD.

Options: Auto (Default) / Limit / Manual

*Note: The following items appear only when you set the MCT Timing Mode item to [Manual] or [Limit]*

#### Memclock Value

This item sets the memory clock value in MHZ.

Options: DDR3-800 / DDR3-1066 / DDR3-1333 / DDR3-1600

#### DRAM Timing Mode

Select the DRAM Timing Mode

Options: Auto (Default) / Manual

*Note: The following items appear only when you set the DRAM Timing Mode item to [Manual]*

#### CL

Options: Auto (Default) / 5~19 CLK

#### 2TCMD

Options: Auto (Default) / 1T / 2T

#### TRCD

Options: Auto (Default) / 2~19 CLK

**TRP**

Options: Auto (Default) / 5~19 CLK

**TRTP**

Options: Auto (Default) / 4~11 CLK

**TRAS**

Options: Auto (Default) / 8~42 CLK

**TRC**

Options: Auto (Default) / 10~58 CLK

**TWR**

Options: Auto (Default) / 5~8 / 10 / 12 / 14 / 16 / 18 CLK

**TRRD**

Options: Auto (Default) / 1~9 CLK

**TRWTTD**

Options: Auto (Default) / 2~27 CLK

**TWRD**

Options: Auto (Default) / 1~11 CLK

**TWTR**

Options: Auto (Default) / 4~11 CLK

**TRFC0**

Options: Auto (Default) / 90ns / 110ns / 160ns / 300ns / 350ns

**TRFC1**

Options: Auto (Default) / 90ns / 110ns / 160ns / 300ns / 350ns

## MCT Configuration

### Bank Interleaving

This item enables Memory Bank interleaving.

Options: Auto (Default) / Disabled

### Memory Hole Remapping

This item enables or disables Memory Remapping Around Memory Hole.

Options: Enabled (Default) / Disabled

### Power Down Enable

This item enables or disables DDR power down mode.

Options: Disabled (Default) / Enabled

## **BIOSTAR Memory Insight**

### DDR3\_A1/A2

These items display SPD information of DDR3 memory.

## 7 Exit Menu

This menu allows you to load the optimal default settings, and save or discard the changes to the BIOS items.

### Discard Changes and Exit

Abandon all changes made during the current session and exit setup.

### Save Changes and Reset

Reset the system after saving the changes.

### Restore Defaults

This selection allows you to reload the BIOS when problem occurs during system booting sequence. These configurations are factory settings optimized for this system.

### Launch Shell from device

This item attempts to EFI Shell application (Shellx64.efi) from one of the available devices.
